Message from the Guest Editor

Dear Colleagues,

Canine behaviors have been studied from the aspect of owner's perceptions, symptoms of behavior disorders, and medical disorders such as neurological conditions or pain. In recent years, as the knowledge of this field has grown, there is increased awareness of the importance of psychological and behavioral well-being and their impact on the physiological health of dogs. However, we also realize more studies are needed to collect quantitative data that allow for clinical application.

Multidimensional factors that help to enhance our scientific understanding of canine behaviors are

- Interpreting and evaluating behaviors;
- Preventing behavior disorders;
- Optimizing therapeutic outcomes;
- Evaluating behavior training and management;
- Assessing environmental factors;
- Examining influence of caregiver's satisfaction or burden.

This Special Issue welcomes contributions on these topics in original and clinical investigations or literature reviews from interdisciplinary research.

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2023, ranks 10/80 (Q1) in 'Agriculture, Dairy & Animal Science'; 16/167 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.0.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank: JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
