Message from the Guest Editors

The topics of the Special Issue will cover, but are not limited to, leukocyte biology, leukocyte antigens, tumor biology, and associations between immune cell profiles and the progress of diseases and cancers. Moreover, we seek to address the issues of leukocytes in autoimmune diseases and allergies, microbiota regulation of leukocyte maturation and functioning in animals, leukocyte response during tumorigenesis, and tumor-infiltrating leukocytes (TILs). This Special Issue aims to provide an overview of recent advances in the above areas in livestock and company animals.

Deadline for manuscript submissions:
