Deadline for manuscript submissions: closed (14 May 2021)

Message from the Guest Editors

Comparative pathology, translational research, and clinical trials involving companion animals have the ultimate goal of advancing our medical knowledge of both human and veterinary species. Furthermore, comparative pathology plays a fundamental role in the One-Health concept. The National Cancer Institute have long recognized the potential of naturally occurring tumors in veterinary species to advance the study of human cancer, and for that reason the Comparative Oncology Program (COP) was established more than a decade ago. Furthermore, companion, laboratory, and wildlife animals play a pivotal role in our understanding of infectious disease.

In this Special Issue of the prestigious journal Animals, we aim to gather high-quality papers addressing different areas of pathology, with a special focus on comparative aspects with the human species. Researchers working in veterinary pathology, veterinary microbiology and infectious diseases, and veterinary parasitology are welcome to contribute in-depth reviews, original full articles, and unique case reports. The use of immunohistochemical techniques will be of particular interest.
Message from the Editor-in-Chief

Animals is an online open access journal that was first published in 2011. Animals adheres to rigorous peer review and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal welfare, animal ethics and animal science. Animals is covered in the Science Citation Index Expanded (SCIE) in Web of Science and received the latest Impact Factor of 2.752. The journal ranks 14/142 (Q1) ‘Veterinary Sciences’ and 10/63 (Q1) in ‘Agriculture, Dairy & Animal Science’

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, AGRICOLA, AGRIS, Animal Science Database, CAB Abstracts, and many other databases.

Journal Rank: JCR - Q1 (Veterinary Sciences) / CiteScore - Q2 (General Veterinary)
