# Comparative Pathology and Immunohistochemistry of Veterinary Species

Guest Editors:

### Dr. Alejandro Suárez-Bonnet

The Royal Veterinary College, University of London, London WC1E 7HU, UK

#### Dr. Gustavo A. Ramírez

Department of Animal Science, Agrifood, Forestry and Veterinary Campus, Universitat de Lleida, 25003 Lleida, Spain

Deadline for manuscript submissions: closed (14 May 2021)

Comparative pathology, translational research, and clinical trials involving companion animals have the ultimate goal of advancing our medical knowledge of both human and veterinary species. Furthermore, comparative pathology plays a fundamental role in the One-Health concept. The National Cancer Institute have long recognized the potential of naturally occurring tumors in veterinary species to advance the study of human cancer, and for that reason the Comparative Oncology Program (COP) was established more than a decade ago. Furthermore, companion, laboratory, and wildlife animals play a pivotal role in our understanding of infectious disease.

In this Special Issue of the prestigious journal Animals, we aim to gather high-quality papers addressing different areas of pathology, with a special focus on comparative aspects with the human species. Researchers working in veterinary pathology, veterinary microbiology and infectious diseases, and veterinary parasitology are welcome to contribute in-depth reviews, original full articles, and unique case reports. The use of immunohistochemical techniques will be of particular interest.

#### Prof. Dr. Clive J. C. Phillips

1. Institute of Veterinary Medicine and Animal Sciences, Estonian University of Life Sciences, Kreutzwaldi 1, 51014 Tartu, Estonia 2. Curtin University Sustainability Policy (CUSP) Institute, Kent St., Bentley 6102, Australia Animals is an on-line open access journal that was first published in 2011. Animals adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. Animals is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 3.0 (2022, ranks 12 /62 (Q1) in 'Agriculture, Dairy & Animal Science'; 13/143 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2

**Message from the Editor-in-Chief** 

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases. **Journal Rank:** JCR - Q1 (*Veterinary Sciences*) / CiteScore - Q1 (*General Veterinary*)
