

## Special Issue

# Emerging Equine Infectious Diseases: Control and Biosecurity

### Message from the Guest Editor

With a changing climate and increased frequency of national and international equine travel the horse has never been more vulnerable to emerging infectious disease events. In this issue, we will focus on recent emerging disease events that have impacted horses. This issue will present research that will improve our understanding of pathogens and the interactions between the pathogen, horses and the environment. It is hoped that the findings presented in this issue can inform and educate the various equine industries globally on an emerging infectious disease that threatens the health and wellbeing of horses and result in enhanced biosecurity and control measures to help safeguard horses from the impact of future emerging disease events.

---

### Guest Editor

Dr. Gary Muscatello

Faculty of Science, The University of Sydney, Sydney, NSW 2006, Australia

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

#### Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary )
