

Special Issue

Evaluating Sustainable Livestock Production Systems –Focus on Animal Welfare, Environmental Impact, and Economics

Message from the Guest Editors

We are pleased to invite you to submit manuscripts to this Special Issue of *Animals* titled “Evaluating Sustainable Livestock Production Systems—Focus on Animal Welfare, Environmental Impact, and Economics”. Sustainability is an increasingly important topic in food animal production. As societal expectations and company commitments related to sustainable livestock production continue to grow across areas of the world, so does the need to evaluate current livestock production practices and management strategies. This Special Issue aims to explore the nexus between animal welfare and other aspects of sustainability in the social, environmental, and economic domains. Manuscripts need not cover all domains of sustainability but should include a component related to animal health and welfare. In this Special Issue, original research articles and reviews are welcome.

Guest Editors
