

Special Issue

Chlamydial Diseases in Animals

Message from the Guest Editors

Chlamydiosis includes a group of diseases caused by the Chlamydia genus bacteria. These infect a wide range of hosts, causing a broad range of infections and diseases, some of which have clinical significance in humans. These diseases include reproductive, ocular, encephalic, enteric and respiratory syndromes that can be fatal. Therefore, these diseases have an important role in human and animal health. This Special Issue aims to contribute to the interaction and diffusion of knowledge on Chlamydiosis in animals. I am pleased to invite you to contribute your research with different science foci, including biology, pharmacology, epidemiology, biochemistry, microbiology and genetics, with the aim of providing tools for a better understanding of Chlamydial diseases in animals. For this Special Issue, original research articles, reviews and etc. are welcome for submission. Research areas may include (but are not limited to) the following: the discovery of new species, immunology and pathology studies, diagnostic techniques, novel vaccines, alternative treatments, host/pathogen interaction, epidemiological studies, risk factors and economic impacts.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

2. Curtin University Sustainability Policy (CUSP) Institute, Kent St., Bentley 6102, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
