The Behaviour, Needs and Welfare of Pinnipeds in Human Care

Message from the Guest Editor

The reasons that pinnipeds may be kept in captivity include public display in zoos and aquaria, captive breeding for conservation purposes, scientific research, and temporary captivity for rehabilitation of stranded animals. Historically, poor understanding of the natural behaviours and habitats of pinniped species may have led to limited understanding by human carers of how captive pinnipeds' social and physical environment would affect their mental and physical state. Now, however, there is a growing plethora of literature on pinniped behaviour and ecology, which can inform the modern design of captive animals' social and physical environment in such a way as to allow the expression of the natural behaviour repertoire and full cognitive capacities and eliminate stereotypic behaviours. Deep sea environments and natural prey can seldom be simulated in captivity. However, most pinnipeds are highly social around their coastal (or ice) habitats, which may inform enclosure design and 3D aquatic space required for physical and mental health. Thus, studies are required to create an ethogram for each species and develop welfare assessment tools accordingly.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

1. Curtin University Sustainable Policy (CUSP) Institute, Curtin University,
Kent St., Bentley, WA 6102, Australia

2. Former Foundation Professor of Animal Welfare, University of
Queensland and Foundation Director, Centre for Animal Welfare and
Ethics, University of Queensland, Brisbane, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid
by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,
PMC, Embase, PubAg, AGRIS, Animal Science Database,
CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General
Veterinary)
