

Special Issue

Bird Behavior and Diversity in the Anthropocene

Message from the Guest Editor

Our planet is facing rapid changes due to anthropogenic changes, such as agriculture, cattle raising, urbanization and climate change. Therefore, it is relevant to understand how these changes are affecting biodiversity. Birds are relatively easy to survey, and they can respond to anthropogenic changes. A deep understanding of bird responses to land use and climate changes could be achieved by analyzing different bird aspects, such as behavior, population changes and diversity changes. Accordingly, this Special Issue aims to analyze behavioral-, population- and community-level responses of birds in response to global changes, which will help enrich our knowledge and predict the impacts of future global changes on birds. Manuscripts within the scope of this Special Issue, either original research or review articles, are welcome to be submitted.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

1. Curtin University Sustainable Policy (CUSP) Institute, Curtin University, Kent St., Bentley, Western Australia 6102, Australia
 2. Former Foundation Professor of Animal Welfare, University of Queensland and Foundation Director, Centre for Animal Welfare and Ethics, University of Queensland, Brisbane, Australia
