

Special Issue

Future-Oriented Technologies for Enhancing Nutritional and Sensory Quality of Fresh Meat and Processed Meat Products

Message from the Guest Editor

Fresh meat and processed meat products are rich in high-quality protein and micronutrients such as vitamin B, iron, etc. They are essential foods for a healthy life. The consumption of meat and processed meat products is continuously increasing worldwide, and the technologies related to breeding, slaughter, aging, tenderness enhancement, additives, processing, microbiome, etc., are improving the nutrition and quality of muscle-based foods. However, world meat consumption patterns are changing due to the COVID-19 pandemic, frequent outbreaks of livestock diseases, aging populations, personalization, and value consumption. This Special Issue aims to prepare for future meat consumption trends and expand the meat industry. We invite the submission of your valuable original research articles and reviews. Topics should include (but are not limited to) the followings:

- Innovative technologies for nutritional fortification and tenderness improvement of fresh meat;
- Advanced processing technologies for flavor and functionality enhancement of meat products;
- Development of senior-friendly foods using livestock muscles.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

1. Curtin University Sustainable Policy (CUSP) Institute, Curtin University, Kent St., Bentley, Western Australia 6102, Australia
2. Former Foundation Professor of Animal Welfare, University of Queensland and Foundation Director, Centre for Animal Welfare and Ethics, University of Queensland, Brisbane, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
