Surviving in the Dark: The Complexities of Nocturnal Animal Behavior and Adaptation

Message from the Guest Editors

The field of nocturnal animal behaviour and adaptation is a fascinating, developing area focusing on the ecological and biorhythmic changes in species that need or prefer to be awake during the night. Recent advances in methodologies have significantly improved the ability to study and understand some of these changes. These include field-based methods, which allow for us to collect more detailed data than ever before; analytical methods, which allow for us to interpret these data; and genetic and taxonomic methods, which allow for us to reveal more cryptic nocturnal animals. The world, and consequently, all natural values, have been influenced by climate change and anthropogenic changes, posing additional difficulties in understanding some biological adaptations. Scientists have an even more difficult task to distinguish between normal biological adaptations and those influenced by climate- or other human-mediated effects, such as artificial light at night.

Guest Editors

Dr. Luísa Rodrigues

Instituto da Conservação da Natureza e das Florestas, Lisbon, Portugal

Prof. Dr. Anna Nekaris

1. School of Life Sciences, Anglia Ruskin University, Cambridge CB1 1PT, UK

2. Nocturnal Primate Research Group, Oxford Brookes University, Oxford OX3 0BP, UK

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

1. Curtin University Sustainable Policy (CUSP) Institute, Curtin University, Kent St., Bentley, Western Australia 6102, Australia
2. Former Foundation Professor of Animal Welfare, University of Queensland and Foundation Director, Centre for Animal Welfare and Ethics, University of Queensland, Brisbane, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
