

Special Issue

Evolution, Ecology and Management of Wild Boar and Deer

Message from the Guest Editor

The population sizes of wild boar and some deer species across Europe and Asia have increased significantly in recent decades. This trend has also been detected on other continents such as America and Oceania, where wild boar are an invasive species. Underharvest has been proposed as a major determinant that favors big game species. On the other hand, the number of hunters in regions such as Europe and North America has been declining for several decades, and this downward trend is expected to continue in the future. The densities of wild boar and deer deeply impact forest preservation and the spread of infectious diseases. Therefore, to deal with these threats to natural communities and human activities, it is necessary to improve current knowledge of the evolution and ecology of these species and to develop management strategies. This Special Issue welcomes contributions on the evolution, ecology and management of wild boar and deer. The knowledge provided by these contributions could increase our chances of overcoming certain threats to biodiversity conservation and human activities.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

1. Curtin University Sustainable Policy (CUSP) Institute, Curtin University, Kent St., Bentley, Western Australia 6102, Australia
 2. Former Foundation Professor of Animal Welfare, University of Queensland and Foundation Director, Centre for Animal Welfare and Ethics, University of Queensland, Brisbane, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
