

Special Issue

Morphological and Physiological Research on Fish: Second Edition

Message from the Guest Editors

This Special Issue is dedicated to the application of morphological and physiological studies carried out on fish. Fish represent the largest and most diverse group of vertebrates, and these animals are used in both research and industry. On the one hand, aquaculture is one of the world's most efficient and sustainable methods to produce high-quality protein. On the other hand, in the last decades, fish have emerged as an interesting model system in biomedical research due to their close similarities with mammals in terms of various basic mechanisms. Morphological studies provide a context for comprehending the spatial organization and relationship between physiological and biochemical data and the molecular machinery that is explained through molecular techniques directed at the genome, transcriptome, and proteome. For this reason, new morphological and physiological studies of fish could broaden our knowledge pertaining to these animals, with remarkable and interesting applicability both in basic and applied research. You are cordially invited to contribute to this theme or related research topics in order to improve the existing anatomical and physiological knowledge of fish.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

2. Curtin University Sustainability Policy (CUSP) Institute, Kent St., Bentley 6102, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
