

# Special Issue

## Beef Cattle Production and Management

### Message from the Guest Editors

Beef production is a major component of agricultural systems worldwide, present every single continent except for Antarctica. Beef cattle production plays an essential and direct role in human nutrition, growth, and health, while being a major component of economic, political, and social aspects of societies. This Special Issue “*Beef Cattle Production and Management*” aims to present state of the art information on beef cattle production and management across the globe, highlighting the differences in global beef cattle production and management practices while highlighting the strengths and values of different production systems.
