Special Issue

Detection of Parasites Using Traditional and Advanced Molecular Techniques

Message from the Guest Editors

The global death toll from parasitic diseases has been reduced, partly due to the widespread use of molecular tests in the diagnosis, therapy, and epidemiological research of these illnesses. Techniques, such as optical microscopy, are employed in the laboratory for the morphological identification of parasites, which is the standard practice in parasitology. The inconsistency in detecting these parasite forms may reduce the sensitivity of such approaches. To overcome these obstacles, molecular techniques are used to identify parasites that cause parasitic illnesses. The utility of molecular techniques in epidemiological studies is particularly striking because studies of this nature involve the genetic diversity of populations, their susceptibility to infection and the possibility of mutation, the geographical spread of parasite illnesses, and their association with hosts and clinical manifestations.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips
1. Institute of Veterinary Medicine and Animal Sciences, Estonian University of Life Sciences, Kreutzwaldi 1, 51014 Tartu, Estonia
2. Curtin University Sustainability Policy (CUSP) Institute, Kent St., Bentley 6102, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
