

Special Issue

Genetics and Genomics of Livestock Health, Fertility and Product Quality: 2nd Edition

Message from the Guest Editor

The global population is expected to approach 10 billion by the year 2050, while the economic status of people in developing countries will continue to improve. As a result, it is anticipated that the worldwide demand for animal products will increase by 70% by 2050.

Increasing animal production will require a deep understanding of animal biology using genetics and genomics to feed the world's growing population.

Furthermore, consumers desire high-quality products for consumption. At the same time, farmers need to combat diseases in the face of increased antimicrobial resistance and pressure from consumers and regulators to minimize the use of antibiotics. Genetics and genomics will play key roles in increasing the efficiency of production systems. Genetic selection and innovations must target animal production, product quality, reproduction, health, and welfare such that a high-quality, safe, healthful, and affordable food supply is available to everyone around the world. Genetics and genomics papers that address these important topics are welcome.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

1. Institute of Veterinary Medicine and Animal Sciences, Estonian University of Life Sciences, Kreutzwaldi 1, 51014 Tartu, Estonia
2. Curtin University Sustainability Policy (CUSP) Institute, Kent St., Bentley 6102, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
