Advances in Reptile and Amphibian Infectious Diseases

Message from the Guest Editor

There has never been a more exciting time to be investigating infectious disease! With today's technologies, the sky is the limit as to what we can discover and how we can positively impact reptiles and amphibians on both the individual and population levels. Given the conservation perils that many of these species face and the growing appreciation for nontraditional species as a part of human–animal bonds, the need to advance the field of reptile and amphibian infectious disease is clear. We are pleased to invite you to submit the results of your research in this area. We will consider manuscripts exploring any of the facets of the epidemiologic triad of infection (host susceptibility, microbe characteristics, and susceptible environment conditions), as well as those covering the clinical manifestations of disease. Clinical case reports and case series that present newly discovered infectious agents and/or novel presentations will be considered if they present opportunities to advance clinical medicine. Studies reporting basic and clinical research are equally welcome.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips
