

## Special Issue

# Vector-Borne and Zoonotic Diseases in Dogs and Cats: Second Edition

### Message from the Guest Editors

This Special Issue of *Animals* invites contributions from across disciplines, including epidemiology, microbiology, veterinary medicine, ecology, animal welfare science, and public health policy associated with vector-borne agents and other diseases of dogs and cats that are potentially transmitted to humans. We welcome studies that explore the emergence and re-emergence of zoonotic diseases under changing climatic conditions, novel treatments and diagnostic protocols, antimicrobial resistance in zoonotic pathogens, and the impact of disease control strategies on animal welfare. Additionally, we encourage submissions that examine how shifting socio-cultural attitudes toward animal ownership and management influence vector-borne and zoonotic disease transmission risks.

---

### Guest Editors

Dr. Antonio Ortega-Pacheco

Department of Animal Health and Preventive Medicine, Autonomous University of Yucatan, Merida 97000, Mexico

Dr. Matilde Jimenez-Coello

Laboratory of Microbiology, Regional Research Center "Dr Hideyo Noguchi", Autonomous University of Yucatan, Merida 97000, Mexico

---

### Deadline for manuscript submissions

30 November 2025

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

#### Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
