Advances in Veterinary Pharmacology: Improving Treatment Modalities for Animal Pathology

Message from the Guest Editors

In this Special Issue, original research articles and reviews are welcome, and research areas may include, but are not limited to, the following:

- Research of novel compounds and therapeutic agents tailored to specific animal pathologies;
- Studies of the absorption, distribution, metabolism, and excretion of veterinary drugs and their dynamic interactions in different species;
- Investigation of the pharmacological requirements and responses of different species to optimize treatment outcomes;
- Research to refine dosing regimens to improve the efficacy and safety of veterinary medicines and to minimize adverse effects;
- Advances in the development and application of targeted therapies, taking into account individual differences in animals;
- The interconnectedness of animal, human, and environmental health, in line with the One Health framework.

We look forward to receiving your contributions.
