Amino Acids Nutrition and Health in Farm Animals

Message from the Guest Editor

Protein nutrition is critical for the health of farm animals due to multiple functional roles in cell proliferation, intestinal health, and the maintenance of biological processes, such as immune response, embryo attachment and implantation, fetal survival and development, disease recovery, and the production of meat, milk, and eggs. It is generally believed that peptides and amino acids are the predominant mediators that confer to these functions in humans and animals. Original papers, including research papers and review papers related to protein, peptide, amino acids, and the nutrition and health of farm animals, are welcome to be submitted to this Special Issue. All submitted papers will be reviewed according to the *Animals* journal guidelines.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
