Nutrition, Gut Microbiome and Health in Dogs and Cats

Message from the Guest Editors

The gut microbiome is an important determinant of health in companion animals, including dogs and cats. It is shown to be modifiable through diet, and it may determine various health outcomes. Compared to human gut microbiomes, our understanding of canine and feline gut microbiomes is only in its infancy. With recent advances in microbiome sequencing technology, the emerging use of functional ingredients, such as insect- and plant-based proteins, pre-/pro-/post-biotics in pet food, as well as novel diets and supplemental products targeting various life stages or diseases, many research questions in this area need to be explored. Enhancing our understanding of canine and feline gut microbiomes could significantly improve not only the well-being of the pets themselves, but also positively impact pet owners. Moreover, it could lead to new opportunities for innovation in products and services within the pet health industry. The goal of this Special Issue is to investigate the relationship between nutrition, the gut microbiome, and health in dogs and cats. We welcome both literature reviews and original research papers using either trials or observations.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

2. Curtin University Sustainability Policy (CUSP) Institute, Kent St., Bentley 6102, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
