Ecological Impact of Feral Animals

Message from the Guest Editors

Feral animals are animals descended from domesticated animals but living in the wild. For example, dogs, goats, cats, parrots, and pigs living in the wild are considered feral animals. The distribution and abundance of feral populations of any of these species, how they interact with other species in wildlife communities, and the factors that limit their survival and proliferation, are all challenging tasks that require further research. The number of factors that could either limit the distribution and/or abundance *or* proliferate the spread and increase the abundance of feral animals could be numerous, and these factors can be of both *biotic* and *abiotic* origins. Additionally, as these are domesticated animals, we must also consider human behavior, which could act in concert with both biotic and abiotic factors, increasing their impact on the environment. The *purpose* of this Special Issue is to enlighten and strengthen research on this topic, which is becoming a necessity with the increase in the populations of feral animals in both rural and urban areas.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

1. Curtin University Sustainable Policy (CUSP) Institute, Curtin University, Kent St., Bentley, Western Australia 6102, Australia
 2. Former Foundation Professor of Animal Welfare, University of Queensland and Foundation Director, Centre for Animal Welfare and Ethics, University of Queensland, Brisbane, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
