

## Special Issue

# Reproductive Management of Ruminants

### Message from the Guest Editors

Dear colleagues, Reproduction is the one of the crucial components that hampers productivity and can be influenced by several factors, i.e., genetic, environmental, nutritional, metabolic, hormonal, immunological, that could lead to reproductive failures. In recent decades, techniques have been developed to improve the management and control of reproduction in ruminants, but research is still needed to increase our understanding of the physiological events that occur in reproduction, which could help in improving farm reproductive management. The aim of this Special Issue is to bring together original research papers and reviews on basic and applied aspects of ruminant reproduction, both in males and females, possibly using new and multidisciplinary approaches.

---

### Guest Editors

Dr. Vittoria Lucia Barile

Council for Agricultural Research and Agricultural Economy Analysis, CREA—Research Centre for Animal Production and Aquaculture, 00015 Rome, Italy

Dr. Olimpia Barbato

Department of Veterinary Science, University of Perugia, Via San Costanzo 4, 06126 Perugia, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

#### Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
