

Special Issue

Second Edition of Veterinary Parasitology: Epidemiology, Control and Prevention Strategies

Message from the Guest Editors

The pathogens parasitosis, helminth, protozoan, and other parasites are of significance in the health of animals and human beings. Once animals become infected, these pathogens cause mechanical injury, robbing nutrition from the hosts, seriously affecting product performance, and bringing serious economic losses to animal husbandry. For example, fasciolosis is the most widely distributed trematodiasis reported in over 81 countries around the world, which causes annual losses estimated at USD 3.2 billion. Moreover, some important zoonotic parasites such as *Toxoplasma gondii* and *Cryptosporidium* are distributed all over the world and threaten both animals and human. In this Special Issue, we aim to show the most recent research and developments in the epidemiology, disease treatment, control, and prevention strategies of parasitic infection or disease in domestic and wild animals. We welcome both original research papers and reviews dealing with this topic.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

2. Curtin University Sustainability Policy (CUSP) Institute, Kent St., Bentley 6102, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
