Advances in Equine Ophthalmology

Message from the Guest Editor

Equine Ophthalmology is a wide field with increasing knowledge and understanding of the pathogenesis and therapeutic options in a variety of congenital and acquired diseases. This Special Issue is planned to give an overview of the most recent advances in equine eye diseases. This edition is intended as a supplement to textbooks and other publications on equine ophthalmology. Articles, reviews and case reports are welcomed. Potential topics include but are not limited to orbital fractures or retrobulbar tumors and abscesses, disorders of the eyelids, conjunctiva, lacrimal system, cornea, sclera, anterior chamber, iris, lens, vitreous cavity, retina and optic nerve as well as, e.g., genetic, microbiological, and immunological findings.
