

# Special Issue

## Advances in Wildlife and Exotic Animals Anatomy

### Message from the Guest Editors

Getting a deep knowledge of the anatomy of domestic animals is basic in the education of the future veterinarians. However, nowadays, there is a growing interest in exotic pets and wild animals, including endangered species. In general terms, their anatomy is considered similar to domestic species, although they have developed adaptations, both physiological and anatomical. These could result in distinctive characteristics that must be recognised by the specialised veterinarians and technicians in charge of their care and conservation, as well as researchers. Distinguishing certain anatomical aspects could help to gain a deeper insight into the different species and, surely, such aspects will have an impact on their physiology and/or their behaviour. Minding some anatomical information on these species is not fully accurate or relevant, we propose a Special Issue “Advances in Wildlife and Exotic Animals Anatomy” to contribute to a comprehensive and thorough knowledge of their anatomical peculiarities, valuable to the scientific community and veterinary clinicians. Hence, we encourage experts from all around the world to submit a manuscript to this Special Issue.

### Guest Editors

Prof. Dr. Matilde Lombardero Fernández

Unit of Veterinary Anatomy and Embryology, Department of Anatomy, Animal Production and Clinical Veterinary Sciences, Faculty of Veterinary Sciences, University of Santiago de Compostela–Campus of Lugo, 27002 Lugo, Spain

Prof. Dr. María del Mar Yllera Fernández

Unit of Veterinary Anatomy and Embryology, Department of Anatomy, Animal Production and Clinical Veterinary Sciences, Faculty of Veterinary Sciences, University of Santiago de Compostela–Campus of Lugo, 27002 Lugo, Spain

### Deadline for manuscript submissions

closed (20 June 2024)

## About the Journal

### Message from the Editor-in-Chief

*Animals* is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

#### Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
