Assisted Reproductive Techniques in Equids

Message from the Guest Editors

Reproductive technologies are crucial for the equine industry moreover these techniques are essential to preserve endangered equid species and breeds. Semen, oocyte and embryo technologies are essential for the development of germplasm banks as well as for sport horse's fertility improvement. We hereby are glad to invite authors to submit original manuscripts and reviews that address any aspect related to equid Assisted Reproductive Techniques (ARTs). Topics of interest include the semen cryopreservation, oocyte maturation, in vivo and in vitro embryo production and cryopreservation, and field applications of the above techniques.
