## Birds in Agricultural Environments

### Message from the Guest Editors

The ongoing decline of farmland biodiversity has been generally attributed to the intensification of agriculture in the past. Agricultural intensification can occur both at field and at landscape scales, although agri-environment schemes and organic farming have been suggested as a way of counteracting the decline of farmland bird communities. In another sense, lands are being abandoned, for example, in many regions of Europe. The widespread abandonment of agricultural practices in some areas increases landscape homogenization, leading to biodiversity declines, although it also gives a chance to rewilding. The Special Issue will focus on species ecology, population trends, current threats, and conservation of birds in agricultural landscapes all over the world. It will also include the implications of different agricultural mechanisms on bird ecology and conservation and possible conservation measures for reaching a more sustainable agricultural environment overall. We invite you to share your recent findings through this Special Issue.

### Guest Editors

Prof. Dr. Jesús Domínguez

Departamento de Zooloxía, Xenética e Antropoloxía Física,  
Universidade de Santiago de Compostela, 15782 Santiago de  
Compostela, Spain

Dr. Sandra Goded

International Bird Conservation Partnership (IBCP)

### Deadline for manuscript submissions

closed (30 September 2021)

## About the Journal

### Message from the Editor-in-Chief

*Animals* is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

#### Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
