Advances in Companion Animal Disease Diagnosis and Treatment

Message from the Guest Editor

To date, many researchers have reported their data relating to novel diagnostic or therapeutic approaches with regards to malignant diseases in companion animals. However, the amount of this evidence is not sufficient when compared with that in human medicine. Therefore, the more clinical evidence in small animal practice is required to accelerate the progress of clinical veterinary science, which will help clinicians as well as disease-suffering animals to conquer malignant diseases. We encourage you to submit a manuscript about novel, promising, or challenging data on the advances in disease diagnosis and treatment in companion animals. Areas of interest in this Issue include a variety of topics, focusing on diagnostic procedures or therapeutic approaches in companion animals. Systematic reviews, prospective or retrospective studies will be reviewed and considered for publication in this Issue.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips
