

Special Issue

Unveiling the Anatomy of Animals: From Comparative Studies to Clinical Applications

Message from the Guest Editors

The title of this Special Issue is *Unveiling the Anatomy of Animals: From Comparative Studies to Clinical Applications*, and therefore, it especially welcomes comparative research on the selected organs of wild animals. You are invited to submit of high-quality review articles and original research mainly covering comparative anatomy, using histological, histochemical, ultrastructural, and immunohistochemical methods. Comparative studies based on computed tomography (CT) and magnetic resonance imaging (MRI) techniques are also welcome in this Special Issue. The purpose of this Special Issue aims to provide data that may be used to develop techniques and treatment methods that can be used by veterinarians on wild animals in zoos as well as national parks.
