

Special Issue

Challenges in Equine (Assisted) Reproduction

Message from the Guest Editor

Most definitely, the horse is one of the most intriguing species when it comes to reproduction. Equine reproduction is characterized by several unique features, like the resistance to superovulation, the challenge to obtain sperm capacitation and fertilization *in vitro*, the selective transport of embryos through the oviduct, the formation of a glycoprotein capsule and endometrial cups,... As such, research in this field is challenging, but interesting, and it provides the basis for improved knowledge and clinical applications. This has resulted in a recent worldwide increase in the application of assisted reproductive technologies in the horse. For this special issue, we invite original research papers that address these challenges in equine reproduction, leading to fundamental insights into equine reproduction and pregnancy and/or aiming at clinical application.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

1. Curtin University Sustainable Policy (CUSP) Institute, Curtin University, Kent St., Bentley, WA 6102, Australia
 2. Former Foundation Professor of Animal Welfare, University of Queensland and Foundation Director, Centre for Animal Welfare and Ethics, University of Queensland, Brisbane, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
