

Special Issue

Coxiella burnetii and Its Impact on Cattle Reproductive System

Message from the Guest Editors

Coxiella burnetii is a crucial zoonotic pathogen. This Special Issue of *Animals* focuses on *Coxiella burnetii* in cattle, sheep and goats. Firstly, the clinical significance of this pathogen and its diagnosis in humans will be briefly reviewed; subsequently, in order to offer enhanced knowledge to veterinarians, diagnostic procedures and their limitations will be detailed and discussed with a special focus on the clinical presentation of Coxiellosis in ruminants. Finally, control strategies, with a focus on vaccination and its efficacy, will be presented. Both case reports on *Coxiella burnetii* infections, and reviews on this fascinating pathogen and the complex illness it provokes, are exceedingly welcome.
