

# Special Issue

## Diseases of the Small and Large Intestine, Liver and Pancreas in Small Animals: Second Edition

### Message from the Guest Editors

This Special Issue welcomes a wide range of research articles related to small animal gastroenterology. We welcome papers from any field related to diseases of the intestine, liver, and pancreas in small animals, such as clinical and clinicopathological markers, interactions between the diet, microbiota, and gut, metabolomics, ultrasonography, and advanced imaging, interventional radiology, novel treatments, and comparative pathologies. Intestinal, pancreatic, and hepatic diseases present a daily challenge for clinicians worldwide; small animal gastroenterology is still one of the fastest-growing research fields with new diagnostic and prognostic markers and therapeutic strategies for various intestinal, pancreatic, and liver diseases.
