

## Special Issue

# Canine Neuro-Oncology and Neurodegenerative Diseases

### Message from the Guest Editor

Life expectancy for pet dogs has significantly increased due to improvements in healthcare, nutrition and lifestyle. In addition to this, in the last few decades, there have been remarkable advances in the diagnosis and treatment of canine neurological diseases. However, nervous system tumors as well as neurodegenerative diseases remain a significant source of morbidity and mortality in pet dogs, with limited treatment options. Therefore, research in these areas is an opportunity to expand the knowledge of canine diseases and to develop new treatments and preventive measures. In this Special Issue, we invite original research papers and reviews or studies that address pathophysiology, risk factors, preventive measures, treatments and outcomes as well as other topics related to neuro-oncology and neurodegenerative diseases in dogs.

### Guest Editor

Dr. Alejandra Mondino

Department of Clinical Sciences, College of Veterinary Medicine, North Carolina State University, Raleigh, NC, USA

### Deadline for manuscript submissions

closed (15 December 2023)
