Clinical Research Advances in Intensive Neurorehabilitation in Animals

Message from the Guest Editors

In recent times, neurorehabilitation has been implemented in daily clinical practice as an essential tool for the recovery of ambulation, with increasing emphasis on animals. All dogs and cats not presenting with deep pain, in either chronic or acute situations, can benefit from complementary and multimodal rehabilitation programs. Therefore, target patients may be those with spinal cord compressive myelopathies (Hansen type I and II) usually after a surgical approach, vascular or traumatic noncompressive myelopathies, vertebral fractures or luxation, and patients with peripheral nervous system disorders ranging from neuropraxia to severe axonotmesis injuries. Some of these patients are condemned to euthanasia. Therefore, we extend an invitation to all our colleagues to become pioneers in this area of veterinary medicine, emerging with necessary scientific soundness and rigor. We encourage the submission of article contributions in formats supported by this journal, particularly (but not only) in the form of research articles, reviews, and viewpoints.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

1. Curtin University Sustainable Policy (CUSP) Institute, Curtin University, Kent St., Bentley, Western Australia 6102, Australia
 2. Former Foundation Professor of Animal Welfare, University of Queensland and Foundation Director, Centre for Animal Welfare and Ethics, University of Queensland, Brisbane, Australia
