

Special Issue

Step by Step: Detection, Diagnosis, Control and Treatment of Ruminant Lameness and Foot Diseases

Message from the Guest Editor

We want ruminants to live long and healthy lives in order to minimize their impact on climate change and antimicrobial resistance. Despite considerable research and knowledge exchange, lameness continues to be prevalent and debilitating in ruminants worldwide, and a reduction in the prevalence and incidence of lameness in herds and flocks would improve their quality of life, and contribute positively to these global challenges. We are in the midst of a wave of novel technologies being employed to address lameness in ruminants. The aim of this Special Issue is to collect recent research on the enhanced detection, diagnosis, control, and treatment of lameness and foot diseases in ruminants, with the aim of highlighting advances and further challenges regarding this important subject.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

1. Curtin University Sustainable Policy (CUSP) Institute, Curtin University, Kent St., Bentley, Western Australia 6102, Australia
2. Former Foundation Professor of Animal Welfare, University of Queensland and Foundation Director, Centre for Animal Welfare and Ethics, University of Queensland, Brisbane, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
