# **Special Issue**

### Effect of Feed Additives/Supplements on the Quality of Animal Products

#### Message from the Guest Editor

Nowadays, animal products are required to address many challenges: satisfying the global demand for animal protein, ensuring food security for the world population as well as contributing and maintaining to human health and animal welfare, and safeguarding the environment. We are placed to invite you to submit papers that address the use of feed additives, byproducts, or nutritional strategies for improving the quality of animal products and the environmental impact of animal productions. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: effect of feed, additives/supplements, natural extract, enzymes, essential oils, plant metabolites, ammino acids, vitamins, yeast, probiotics, macroalgae and microalgae, and byproducts on the quality and functionality of animal products (milk and meat), as well as on the environmental impact of animal productions.
