Infection, Immune Escape, and Pathogenic Mechanism of African Swine Fever Virus

Message from the Guest Editor

African swine fever virus (ASFV) has dealt a heavy blow to the global pig industry since it was introduced into China in 2018. ASF has spread rapidly worldwide due to the lack of safe, effective, and quality-controlled vaccines. However, the pathogenesis, immune evasion, and immune protection mechanism of ASFV is not fully understood, which brings great difficulties to the research and development of a safe and efficient ASF vaccine. The aim of this Special Issue is to study the infection and pathogenesis of ASFV as well as the molecular and cellular mechanisms of how ASFV escapes the host innate and adaptive immune responses.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: 1) the function of ASFV genes, 2) mechanism of ASFV infection and pathogenicity, 3) mechanisms of ASFV negatively regulating innate immune, 4) mechanism of ASFV regulating inflammatory response, 5) mechanisms of ASFV regulating autophagy, 6) mechanisms of ASFV inducing cell death, and 7) molecular and cellular mechanism of immune protection against ASFV.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

1. Curtin University Sustainable Policy (CUSP) Institute, Curtin University, Kent St., Bentley, WA 6102, Australia
 2. Former Foundation Professor of Animal Welfare, University of Queensland and Foundation Director, Centre for Animal Welfare and Ethics, University of Queensland, Brisbane, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
