

# Special Issue

## Advances in Animal Anatomy Studies

### Message from the Guest Editors

We invite and encourage you to submit papers to the Special Issue "Advances in Animal Anatomy Studies". Animal anatomy is not only a distinct field of science but also plays an important role in the education of future veterinarians, biologists, and specialists in animal-production-related fields. Therefore, the Special Issue is for articles related to advances in animal anatomy studies, with topics of interest including the anatomy of domestic and free-living species, comparative and topographic anatomy, modern methods of teaching, and the use of advanced technology in morphological subjects, including various imaging techniques and modern techniques of anatomical specimen preparation. We hope to assemble a series of research articles, reviews, perspectives, and summary opinions that reflect the full diversity of the field, highlighting current and future trends in the teaching of morphological and preclinical subjects.

### Guest Editors

Dr. Karolina Barszcz

Department of Morphological Sciences, Institute of Veterinary Medicine, Warsaw University of Life Sciences-SGGW, Nowoursynowska Str. 159c, 02-776 Warsaw, Poland

Prof. Dr. Michal Skibniewski

Department of Morphological Sciences, Institute of Veterinary Medicine, Warsaw University of Life Sciences-SGGW, Nowoursynowska Str. 159c, 02-776 Warsaw, Poland

### Deadline for manuscript submissions

closed (15 May 2024)

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

#### Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
