Special Issue

Latest Advances in Neutering and Reproduction Control in Dogs

Message from the Guest Editor

We would like to invite you to contribute to our Special Issue on the "Latest Advances in Neutering and Reproduction Control in Dogs". Advancing our understanding of this subject will allow us to effectively manage animals, promote optimum health and wellbeing, and maximise animal welfare. Further research in this area is important to continue to build knowledge, informing the best practices for reproduction control.

The purpose of this Special Issue is to present the latest research in the field of neutering and the control of reproduction in dogs, considering impacts on dog behaviour and health and focusing on the latest methods of reproduction control, particularly looking at the use of GnRH agonists and the potential beneficial and detrimental effects of long-term use as an alternative to surgical methods of reproduction.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. Animals adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. Animals is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips
