

Special Issue

Protecting Endangered Species: Second Edition

Message from the Guest Editor

Endangered animals need more attention due to their vulnerability and sensitivity to environmental deterioration and human disturbance. This Special Issue aims to provide knowledge on the conservation of endangered species and threatened animals through original articles, reviews, case reports, short communications, etc. The scope of this Special Issue focuses on the endangered species themselves, the habitats they depend on, the influencing factors faced by endangered animals, the genetics issue of the protected animals, the theory and method of conservation, and the conservation policy. The disciplines related to this Special Issue may include conservation biology, behavior, genetics, physiology, endocrinology, evolutionary conservation biology, etc.
