New Insights in Large Animal Neurology

Message from the Guest Editors

The last decade has witnessed significant progress in the diagnosis of neurological diseases in large animals, especially due to the refinement of clinical examination, imaging, pathological and genetic exams, and serological and molecular tests. We are pleased to invite you to contribute to this Special Issue entitled "New Insights in Large Animal Neurology", which aims to gather original papers, literature reviews and case reports that address recent advances concerning large animal neurology. The scope of this Special Issue includes, but is not limited to, the following topics:

- Congenital, genetic and familial disorders;
- Infectious, inflammatory and immune diseases;
- Physical and chemical causes;
- Toxic diseases;
- Nutritional and metabolic diseases;
- Neoplasms and other tumors causing neurological disturbances.

We look forward to receiving your contributions. Best regards,
