## Morphological and Immunohistochemical Research on Animals

### Message from the Guest Editor

The results of morphological, histochemical, and immunohistochemical studies are the basis of the knowledge relating to histology and anatomy and constitute the starting point for cognitive investigations aimed at verifying the changes that occurred, for example, in pathological conditions, in animals reared in different environmental conditions or subjected diets with different characteristics. The results of this research are constantly evolving also due to the use of increasingly specialized techniques and increasingly specific reagents. Furthermore, the growing interest in wild and/or unconventional animal species has broadened the field of application of these researches and investigation techniques with interesting results also in view of a comparison with the most studied animal species.

### Guest Editor

Dr. Cecilia Dall'Aglio

Department of Veterinary Medicine, University of Perugia, Via San Costanzo 4, 06126 Perugia, Italy

### Deadline for manuscript submissions

closed (1 April 2023)

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

#### Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
