Papillomavirus Associated Diseases in Different Species

Message from the Guest Editors

Papillomaviruses (PVs) seem to be one of the major causes of genital and perianal benign and malignant lesions and a significant fraction of several other malignancies arising from the mucosal squamous epithelia, including oropharynx and gastric mucosa in different species. We welcome submissions of research and review articles on PVs characterization in different species, mechanisms that contribute to PVs-induced carcinogenesis to bring together expert opinions and new advances from across the field in a Special Issue of *Animals*. We welcome submissions that cover any relevant topic, including the role of oncoviral proteins in cell transformation, the gene mutational profile of viral and host interactions, immune response, clinical behaviour and development of related diseases and therapeutic opportunities including vaccines for PVs-related cancers.

Guest Editors

Dr. Benedetta Passeri

Dr. Elisabetta Razzuoli

Dr. Federico Armando

Dr. Alessandro Ghelardi

Deadline for manuscript submissions

closed (30 June 2022)

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips
