

Special Issue

Pathology of Aquatic Animals

Message from the Guest Editors

Diseases of aquatic animals are an increasing concern for both aquaculture production and wild species constituting a threat to animal health and a potential source of economic losses in productive areas. Up-to-date knowledge of emerging diseases and a better understanding of more known pathological entities is a crucial step for the control and management of aquatic animal diseases. This Special Issue “Pathology of aquatic animals” aims to improve the knowledge in emerging diseases and pathology of aquatic animals. Submission of original research articles as well as review papers are encouraged, specifically on topics concerning pathology, histopathology, immunohistochemistry, molecular biology, and in situ hybridization. You are kindly invited to contribute to this Special Issue with your recent findings on this topic to improve the knowledge on the pathology of aquatic animals.

2. Curtin University Sustainability Policy (CUSP) Institute, Kent St., Bentley 6102, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
