Special Issue

New Insights into the Physiological and Ethological Dimensions of Human-Animal Interactions

Message from the Guest Editors

Human-animal interactions (HAIs) have been defined as the degree of relatedness or distance between animals and humans. HAIs may be either positive, negative, or neutral and their quality depends on a variety of factors. The quality of a HAI can have a profound impact on the welfare of both humans and animals. Therefore, assessment of physiological, behavioural, and cognitive parameters in interacting partners is required for achieving and maintaining high standards of welfare, which in turn is critical to the success of an interaction. In the past several years, there has been a growth in studies on human-animal interactions. The most of the research has been focused on companion or farm animals, but there is a growing interest in laboratory animals, zoo animals, and wildlife. We invite original manuscripts that address any aspects of human-animal relationships with the aim of helping us to understand and promote the health and well-being of both from a One-Health/One-Welfare perspective. Articles on HAIs that involve domestic animals in various contexts. including sports, animal-assisted interventions and farms, zoo/wild animals, and laboratory animals are welcome.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. Animals adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. Animals is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

 Curtin University Sustainability Policy (CUSP) Institute, Kent St., Bentley 6102, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
