Apicomplexan Parasites in Animals: Insights into Epidemiology, Control, Vaccination, and Host Interactions

Message from the Guest Editors

Apicomplexan parasites are significant pathogens affecting animals and are responsible for a range of serious diseases, such as Babesiosis, Cryptosporidiosis, and Toxoplasmosis. These diseases contribute substantially to deadly parasitic infections, yet effective vaccines and therapeutic options remain limited. This Special Issue aims to gather valuable insights that will support the development of novel strategies for controlling diseases caused by Apicomplexan parasites in animals. We aim to showcase recent advances in the following areas related to Apicomplexan parasites in animals: epidemiology, control measures, vaccination strategies, and host–parasite interactions; research contributions to Babesiosis, Cryptosporidiosis, Toxoplasmosis, and other Apicomplexan-related diseases are also highly encouraged. We aim to enhance understanding to combat these significant parasitic infections through collective research. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

1. Institute of Veterinary Medicine and Animal Sciences, Estonian University of Life Sciences, Kreutzwaldi 1, 51014 Tartu, Estonia
2. Curtin University Sustainability Policy (CUSP) Institute, Kent St., Bentley 6102, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
