Special Issue

Reproduction in Domestic and Wild Carnivores

Message from the Guest Editor

The study of carnivore reproduction has lagged behind that of larger domestic species. It was not until the 1980s that domestic dog and cat reproduction achieved relevance and independence. Although there have been an increasing number of studies since then, many of the reproductive aspects of these species have yet to be unveiled. Thus, the aim of this Special Issue is to publish high-quality peer-reviewed articles that update the basic and applied knowledge of domestic and wild carnivore reproduction. I am pleased to invite you to submit your articles to this Special Issue "Reproduction in Domestic and Wild Carnivores", which will involve (but is not limited to) research areas such as physiology, pathology, diagnosis methods, therapeutics, infertility, biotechnology, and contraception.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. Animals adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. Animals is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips
