

## Special Issue

# The Responsiveness of the Dairy Cattle Sector to Societal Challenges

### Message from the Guest Editor

The dairy cattle industry is challenged by different social needs, including the provision of healthy products, improvement of animal welfare, reduction of environmental impact, adaptation to climate change, etc. It has responded in a variety of ways, incorporating efficient management and nutrition, improved reproductive performance, and, certainly, improved animal welfare. The current Special Issue wishes to incorporate and communicate to the public what has been done so far as a response to these challenges, and what needs to be done to further understand the dynamics between society and the dairy industry. Research papers are welcome which incorporate a variety of research methods, from modeling to in vivo or in vitro experiments. Furthermore, a short number of topic-specific literature reviews will be considered.

### Guest Editor

Dr. Andreas Foskolos

Department of Animal Science, University of Thessaly, Campus  
Gaiopolis, 411 10 Larisa, Greece

### Deadline for manuscript submissions

closed (31 May 2022)
