

Special Issue

Sustainable Animal Production 2021

Message from the Guest Editors

Feed efficiency is a key criterion to improve the economic as well as environmental sustainability of the livestock. Additionally, improving feed efficiency will help reduce energy losses as methane, and nitrogen as ammonia, which typically reduce animal performance and contribute to greenhouse gas emissions to the environment.

We invite original research papers and reviews that address the major issues related to animal health, welfare and production (eggs, meat and milk production). Additional topics may include improving productivity, minimizing potential negative impacts on natural resources, reducing greenhouse gases emission as well as ensuring animal welfare, health and safety.

About the Journal

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2024, ranks 15/86 (Q1) in 'Agriculture, Dairy & Animal Science'; 21/170 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Editor-in-Chief

Prof. Dr. Clive J. C. Phillips

Curtin University Sustainable Policy (CUSP) Institute, Curtin University,
Kent St., Bentley, WA 6102, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
